NATUURLIJKE KALKZEEP - NATURAL LIME SOAP – SAVON DE CHAUX NATUREL

Subsurface

Natural Lime Soap is a natural soap and is used in saturating a calcareous subsurface like Fresco Fresco Lime Paint and Marrakech walls. Saturating with lime soap turns a surface water repellent and therefore maintenance friendly. Natural Lime soap can also be used to protect and maintain other materials like stone flooring, concrete, wood, etc.

Properties:

This lime soap comes with a specific scent and reacts with limestone and mineral surfaces by providing them with a water-repellent film. To waterproof a surface several coats of lime soap need to be applied. When enough coats have been applied water shouldn't penetrate the surface anymore. When it does, please apply another coat.

Surface: Dry and free of dust and grease.

Processing: Between 10°C - 35°C.. Shake well, ready for use. Do not dilute. To saturate apply several times with cloth or sponge, rub well into the surface. Dry by rubbing with a clean cloth or polish with a polish pad. Stains may occur when applying excessive quantities of soap. Leave to dry for at least 12 hours at > 20 °C. Leave to dry for at least 7 days before allowing water to cover the surface. Coverage app. 10 m² per liter per coat. Do not clean with corrosive acids, degreasers or abrasive cleaners.

Maintenance:

Flooring and stone: dilute 50 cc of Lime Soap with 10 l. of water and apply once or twice a week.

Walls: apply a coat of soap when the surface apparently absorbs water (visible obscuration when moisturizing the surface). This is especially useful and necessary in bathrooms. Alternatively add lime soap to cleaning water on a weekly basis.

Do not clean with corrosive acids, degreasers or abrasive cleaners.

Shelf life: unlimited

Colour: Yellowish/transparent

Repaint: Degrease with Pure & Original Eco Cleaner, sand down and repaint.

Packaging:

Bottles 1L

Technical advice

Not all occurring sub surfaces and their pre-treatment can be included in this technical sheet. Please consult your dealer for advice on specific situations and conditions. This technical sheet has been compiled to the latest paint technology.

Pure & Original assumes no responsibility or liability for any direct or indirect damage that may occur when using or interpreting the information provided. Application and processing techniques are beyond our control and large differences in the nature of the sub surfaces could demand adaptation of a professional processing technique.
